3M

3M™ Half Facepiece Respirators 5000 Series, Disposable

- » NIOSH approved for respiratory protection against certain organic vapors, acid gases or particulates
- » Multi-purpose respirator assembly works in a variety of workplace applications
- » Half face piece design is ideal for intermittent use
- » Disposable model helps reduce maintenance issues for greater convenience

3M

3M™ Aura™ Particulate Respirator 9211+ N95

- » Three-panel disposable flat-fold respirator features soft inner material and 3M™ Cool Flow™ Valve to help provide comfortable, reliable worker respiratory protection
- » Ideally suited for work settings that involve heat, humidity, or long periods of wear
- » Can also be used to help reduce inhalation of certain airborne biological particles
- » Does not contain components made from natural rubber latex to help prevent reactions from users with latex sensitivities or restrictions
- » Individual packaging and flat fold design provides convenient storage and portability

RESPIRATORY

*Nuisance level refers to concentrations not exceeding OSHA PEL or other applicable government occupational exposure limits, whichever is lower. Full facepieces must be quantitatively fit tested to claim assigned protection factor above 10 in negative pressure mode. Do not use in for respiratory protection against organic vapors or acid gases or environments that are immediately dangerous to life or health (IDLH). Not NIOSH certified for use against ozone.

**The filter is effective for concentrations up to 10 times the Permissible Exposure Limit (PEL) with half facepieces, or 50 times PEL with quantitatively fit tested full facepieces. This filter helps protect against a wide range of oil and non-oil based particulate contaminants. The filter also offers nuisance level odor relief from organic vapors that are below the PEL. Nuisance level refers to concentrations not exceeding OSHA PEL or other applicable government exposure limits, whichever is lower. Do not use for respiratory protection against organic vapors or in environments that are immediately dangerous to life or health (IDLH).

***OSHA requires that gas-proof goggles be worn with half facepiece respirators when used against formaldehyde.
