

# G1 FACEPIECE

## LIGHTWEIGHT, COMPACT & COMFORTABLE

### LIGHTWEIGHT

The G1 Facepiece was designed without electronic components to minimize weight, reduce your stress and fatigue and improve your overall performance level. The entire facepiece weighs less than 1.5 lb. (0.7 kg).

### CROSS CONTAMINATION PROTECTION

The G1 Facepiece has an inhalation check valve, which allows users to breathe in from the regulator, but does not allow exhaled air to go back through the regulator connection. Exhaled breath is transferred outside the exhalation valve into ambient air.

### INTEGRATED COMMUNICATIONS

Voice amplification and Bluetooth radio communications come standard in every G1 SCBA. Powered by one central battery source, no additional electronics need to be added separately, which reduces bulk and snag hazards.

### VERSATILITY

The versatility of the G1 Facepiece is ideal for a variety of respiratory needs. One facepiece provides a solution for multiple respiratory functions, including SCBA, APR, PAPR, and SAR.
