

V-FIT[®] Full-Body Harness

Superior Comfort

1 Using a patent-pending RaceFLEX™ connection, webbing is routed across the chest for a secure and comfortable fit—eliminating the need for bulky chest straps or cumbersome buckles.

2 Shoulder padding responds to your movement to conform to your body, eliminating pressure points and chafing. Shoulder padding can be removed for cleaning, extending the life of the harness.

3 Patented leg strap design keeps leg straps in place as webbing lays horizontally across the thighs, creating a more natural fit.

Flexibility

4 The RaceFLEX Buckle creates an athletic cut contouring the harness to the body and improving upper torso movement on the job.

Adjustability

5 Pull-down adjustment allows you to quickly and easily get the right fit that lasts throughout the work day.

6 Dedicated attachment point for Personal Fall Limiters allows for quick and easy attachment, and keeps your back D-ring free for other use.

WE KNOW WHAT'S AT STAKE.

V-FIT Standard Full-Body Harness

V-FIT Construction Full-Body Harness

V-FIT Standard Full-Body Harness w/Front D-Ring

V-FIT Tower Full-Body Harness w/Front D-Ring

V-FIT Construction Harness Adjustable Waist Pad

The V-FIT Harness' adjustable waist pad allows you to position the waist pad specifically for you and your work day. With its patent pending design, the V-FIT waist pad can be adjusted higher on your torso for lumbar support or lower for work positioning applications. Designed around pressure points and by choosing breathable materials, the V-FIT waist pad delivers ultimate on-the-job comfort.

V-FIT Tower Harness Removable Padded Saddle

In addition to features found on other V-FIT Harnesses, the V-FIT Tower Harness adds an adjustable and removable padded saddle that can be stored when not in use for increased maneuverability. The saddle also includes two large gear rings, and two color differentiated D-rings for work positioning. Combined with the V-FIT construction waist pad, the V-FIT Tower Harness ensures ultimate comfort for long shifts at height.
