

AIMS is an advanced cloud based system that eliminates the complexities around asset management. This comprehensive system provides its user the ability to efficiently and effectively manage accurate up to date detail surrounding all aspects of their assets, work flow and reporting, saving time and resources.

Benefits

- Ability to quickly locate any asset, understand its current status, and all historic data associated with it.
- Instant sight into any past or future planned maintenance and testing associated with each asset.
- In-depth parts inventory tracking. Set up minimum stock quantities and alerts to ensure proper inventory thresholds are maintained and parts are there when you need them.
- Notice of any upcoming testing requirements to help manage resources and scheduling.
- Efficiently create, manage, and track work orders and all resources associated.
- Efficiently create, manage, and track purchase orders to understand current stock and incoming parts.
