

MSA Rescue Belt II System for the MSA G1 SCBA

Emergency Egress for Firefighters

WHEN YOU GO IN, WE GO IN WITH YOU.

Key Features

Ergonomically-contoured Ara-Shield rescue belt pouch stores:

- Choice of 50-ft. MSA SafeTech or FireTech 32 rescue rope.
- Auto-locking Sterling F4 Descender.
- Choice of Crosby, Lightning, Lightning GT hook, or carabiner.

MSA works hard to provide firefighters with the most safety features available on any SCBA. An innovative device for emergency egress, the Rescue Belt II System is a personal escape system integrated into an MSA air mask that allows firefighters to rappel to safety should they become trapped in a building's upper level. The MSA G1 Rescue Belt II is NFPA 1983-certified for use as a personal escape system for emergency escape when installed on MSA-approved air masks. Device can also be used as a standalone product when not installed on an air mask.

Within extreme conditions, this NFPA-compliant device provides all required equipment for rappelling; one belt fits all fire department members. To initiate emergency egress:

1. Use right hand to pull knotted rope end forward to access hook or carabiner and descender.
2. Secure hook or carabiner and engage the descender.
3. Begin your descent. Rescue Belt II System is compatible with MSA ExtendAire™ II and Quick-Fill® Systems.

The Rescue Belt II System can be ordered as an MSA G1 SCBA option or as an individually-sold component for upgrade of your existing MSA G1 SCBA.

Rescue Belt II System Ordering Information

Rope	Connectors			
				
	Crosby hook	Carabiner	Lightning hook	Lightning GT hook
 50-ft FireTech 32	10173088	10173089	10173090	10173101
 50-ft MSA SafeTech	10173102	10173103	10173104	10173105
