¹ Helmets marked with the HT designation have been certified to the optional Higher Temperature test of ANSI/ISEA Z89.1. In this test, helmets are pre-conditioned in an oven at 60°C ± 2°C (140°F ± 3.6°F) and then tested per the ANSI/ISEA Z89.1 Industrial Head Protection Standard for top force transmission. In addition, Topgard Helmets were exposed to a radiant heat load until the surface temperature on the top of the helmet reaches 275°F and then tested per the ANSI/ISEA Z89.1 Industrial Head Protection Standard for top force transmission. The source of the radiant heat load was located above the top of the helmet. This testing is performed by MSA and is not part of the helmet certification process.

⚠ WARNING

Use only the indicated MSA suspension in your MSA hard hat. Do not mix suspension sizes and hard hat sizes (i.e., putting a standard-sized suspension in a large hard hat or any other mismatched combination). Do not use competitor suspensions in MSA hard hats. Inspect your suspension frequently. Suspensions should be replaced every 12 months, regardless of inspection results. Replace immediately (along with the hard hat), if an impact has occurred. Failure to follow these instructions will reduce the energy absorbing ability of the hard hat to receive impact, and could result in serious injury or death.
