*Special note regarding approvals – Approvals are only available (and were obtained) for each component (SCBA, APR and PAPR) as an independent respirator. Although the APR, PAPR and SCBA have been evaluated for seamless convertibility in a contaminated environment, there is currently no standard for which to seek this type of system approval and they have not been evaluated by NIOSH. Users are required to convert among modes in an uncontaminated environment. Please see user's instructions for specific approval information and limitations.
